# CloudBay

## THE BEST SOLUTIONS FOR THE BEST BUSINESS VISIONS

We deliver. You can get the best team to solve your business challenges. Our development teams are goal-oriented, cross-functional, self-organizing, and have many years of experience. Just challenge us and enjoy your success.

## Your Software House that never gives up!

## Challenge your business needs

Solving business problems can be simple and does not have to take months. An agile and modern approach to project implementation is key.
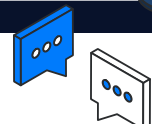

# HOW DOES IT WORK?

**1** TELL US YOUR BUSINESS NEEDS

**2** LET US DO THE BACKLOG AND DESIGNS

**3** WATCH YOUR PRODUCT DEVELOP

**4** GET FEEDBACK AND ENJOY YOUR PRODUCT

## Master level in Cloud-based solutions and IoT

Our solutions based on Cloud and IoT meet the needs of many industries. By applying common standards, we meet the requirements of even the most demanding organisations.

## Key services

### ARTIFICIAL INTELLIGENCE

In recent years, Artificial Intelligence and Machine Learning have emerged as transformative technologies that are reshaping industries across the globe. The field of software development is no exception. AI is revolutionizing the way software is designed, developed, and maintained. We are at the forefront of this transformation, helping businesses navigate the opportunities and challenges presented by AI in software development.

### BESPOKE SOLUTIONS

Did you know that a well-sync team can be several times more efficient than others? Our well-organised and experienced teams create software from scratch following the best practices, state-of-the-art technologies and goal-oriented mindset. We provide cloud, IoT, backend, frontend and mobile solutions for various industries. We ensure compliance with the standards, always the best quality, performance and security.

### CLOUD MIGRATIONS

We perform on-prem systems migration to the cloud, taking into account the most reliable providers, such as AWS, Azure, GCP, and others. We analyze changes in the software, design and create infrastructure, make all required adjustments, and provide full automation. Our experienced cloud engineers help you go through the migration process to accelerate the development of your business.

### CYBER SECURITY

Our certified experts perform full pen tests using modern tools and techniques that simulate hacker attacks. As a result, you get a vulnerability report. However, most of all, we specialize in removing them. We adapt the software to meet very stringent security requirements on many levels, such as API, data, infrastructure, architecture, libraries, OWASP, compliance with regulations, and others.

The best way to start solving a problem is to consult it and exchange experiences. We are ready to help you. The problem will not solve itself. Contact us!
